Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to an image processing method/apparatus wherein deciding similarity between a first pixel and a second pixel and weighted averaging between the first pixel and second pixel, classified in class 382, subclass 209.
 - II. Claims 15-32, drawn to an image processing method/apparatus wherein constructing vector values by arraying scalar values for the first and second pixels; generate new pixel values by making contribution of second pixel large when similarity between first and second pixel is high and by making contribution of second pixel small when similarity is low, classified in class 382, subclasses 228 and 253.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as method for deciding similarity between a first pixel and a second pixel and weighted averaging between the first pixel and second pixel. Invention II has separate utility method for constructing vector values by arraying scalar values for the first and second pixels; generate new pixel values by making contribution of second pixel large when similarity between first and second pixel is high and by making contribution of second pixel small when similarity is low. See MPEP § 806.05(d).

Art Unit: 2624

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Q. Le whose telephone number is 571-272-7424. The examiner can normally be reached on 8:30 A.M - 5:30 P.M.
